4. Examiner's Comment Regarding Requirement for Deposit	8. 🛛 Examiner's	Statement of Reasons for Allowance
of Biological Material	9. 🗌 Other	_·

## EXAMINER'S AMENDMENT

- 1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.
- 2. In the drawings:
  - (a) in Figs. 9A, 9B, 10A, 10B and 11, a label "prior art" should be added to each figure.

## Allowable Subject Matter

- 3. Claims 1-16 are allowable over prior art.
- 4. The following is an Examiner's Statement of Reasons for Allowance based on the Remarks filed on October 18, 2004.

As in claims 1 and 14-16, the prior art of record fails to teach or fairly suggest an optical reproduction apparatus having the following features:

- (a) an annular light shade for condensing a laser light and irradiating the recording layer with the light;
- (b) a reproduction optical system that shades a peripheral portion of a reflected light and reproduces the information from the center portion of the reflected light; and

(c) a condensing lens is arranged between a light shade and a photodetector.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hino et al. (6,178,151) is pertinent because Hino teaches an optical reproduction apparatus having a light filter with a transmissive portion.

McLeod et al. (6,111,828) is pertinent because McLeod teaches a light filter with a transmissive portion.

Choi (5,917,800) is pertinent because Choi teaches a superresolution optical reproduction apparatus. 7. Any response to this action should be mailed to:

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Or faxed to:

(703) 872-9306 (for formal communications intended for entry. Or:

(703) 746-6909, (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Any inquiry of a general nature or relating to the status of this application should be directed USPTO Contact Center (703) 308-4357; Electronic Business Center (703) 305-3028.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim CHU whose telephone number is (571) 272-7585 between 9:30 am to 6:00 pm, Monday to Friday.
